

Additional¹ provisions for tank wagons²:

- 6.28* Tanks must not have sharp-edged deformations (even if there is no loss of the goods carried).
- 6.29* Cracks in tank cradles are not accepted. If the tank is fastened to the underframe using bolts or rivets, none of these must be missing.
- 6.30* The welded joints on the tank and the underframe must not be cracked.
- 6.31* Ladders, platforms and guard rails must be safe to use and must not be loose.
- 6.32* Tank cladding, sun-roofs and insulation must not have come loose.
- 6.33 The tanks and their filling and emptying devices must not leak. It must be possible to seal them hermetically, with the exception of the automatic ventilation devices (Appendix 11, point 6.3).
- 6.34* Screw caps must not be missing.
- 6.35* The blind flanges must not be missing or loose. All the fastening screws must be in place.
- 6.36 The emergency control screw for the emptying valve must be unscrewed.
- 6.37* The indicator on the emptying valve must be **in good condition and readable**.
- 6.38 The dome hatch must be present. It must be possible to close it hermetically.

¹ The numbers marked with * are only mandatory for de tankwagons RID (visual checks)

² Tank wagons are wagons used for transporting liquids, gases, powdered or granular goods (visual checks)
